Response to Amendment

The reply filed on 04-21-2006 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): the examiner only indicated that the method of claim 1 with the added objected to steps was allowable. There was no indication that the apparatus claim 21 would be allowable by incorporating the anchoring means and then adding functional language as to its intended use. An apparatus might have all of the claimed structure, and be capable of performing the claimed functions or steps, but if it is not disclosed as being used in the same manner, a method claim would be allowable while the apparatus claim would not. Therefore, without a previous indication of allowable subject matter with respect to the apparatus claims, the examiner contends that the response is deficient because the claimed apparatus has not been compared to the prior art used in the last rejection, and it has not been specifically pointed out exactly what structure is in the claims which is not in the prior art structure. See 37 CFR 1.111. Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

The examiner did not have sufficient time to hold an interview before processing this action as the examiner was going on vacation and the application required action at the time of return.
